

NO DETOURS.™

Bandag BDU2

*Because we care
about comfort and safety!*

Bandag BDU2

Drive Urban - Regional

Excellent mileage

Up to 20% more than the BDU(E) with the same tread depth and equal weight.

All-seasons safety

M+S pattern, with excellent traction performance on dry and wet roads.

On-board comfort

The special pattern design ensures excellent traction while generating a 20% lower noise than the BDU(E).

Versatility

The speed rating J (100 km/h) makes the tyres also suitable for higher-speed intercity transport.

City buses and other urban traffic vehicles, such as waste collection trucks are exposed to a violent working life: short turns, frequent stop-and-go's, curbs, narrow streets, potholes, irregular loads and changing road surface types, imposing specific requirements towards tyre quality and robustness.

In addition, the tyres should cope with passengers' personal priorities such as safety and comfort, through offering excellent grip on dry and wet roads, as well as stable and silent running.

With the Bandag BDU2, we offer you an exceptional product, fulfilling all technical and personal requirements for this demanding application.
