BRM4

Tough, whatever the conditions.

Part of the Bridgestone Group

Bandag BRM4

All position – On/Off

Great mileage

Count on long tyre life with outstanding resistance to tears and irregular wear.

Robust performance and excellent grip

Get the job done, even in the toughest on/off conditions, thanks to advanced compound and pattern design.

Proven durability

Ensure maximum up-time with great protection against cuts, chips and stone penetration.

Unpredictable payloads, variable distances, ever-pressing deadlines and a full spectrum of weather and surface conditions ranging from sand, mud and asphalt to gravel and rock... The harsh and changeable conditions of On/Off operations demand tyres that are up to the task and above all, able to go the extra mile!

Which is why Bandag developed the BRM4 premium all-position truck tyre tread specifically for On/Off operations. Employing the latest Bridgestone compound and pattern

technologies to get the most out of your valuable casings and ensure they keep on performing both on and off the road.

Whatever the conditions, the Bandag BRM4's unique tapered shoulder design and wide intermediate ribs boost resistance to tearing for outstanding durability, responsive performance and long tyre life. At the same time, the tread's built-in tie-bars keep heel-and-toe wear to a minimum, while stone ejectors protect your casings from penetration damage for even greater mileage potential.

To ensure reliable traction on all surfaces, the Bandag BRM4 also comes with specially engineered shoulder pockets that boost road contact. And with its M+S markings, you can be sure of year-round performance, even in wintery conditions.

All in all, the Bandag BRM4 is the ideal tread for extending the life of Bridgestone On/Off tyres.
